PROFILE

Agriculture graduate from Bangladesh Agricultural University and self-taught builder of Bangla-first AI tools for farmers. Teaches how AI works in Bangla through a free online course and short videos. Also scripts, shoots and edits short films and social media videos. Google Certified Gemini Educator.

EDUCATION

BSc in Agriculture (Hons.), Bangladesh Agricultural University (BAU) Mymensingh, Bangladesh
Session 2020–21 | Graduated: June 2026 | CGPA: 3.055 / 4.00

SSC and HSC, Savar Cantonment Public School and College 2018 – 2020

WORK EXPERIENCE

Senior Operational Officer, Craftly Jun 2026 – present
Early-stage AI software startup, Bangladesh | Full-time, remote

- Support day-to-day operations for a small team building Craftly Workspace, Craftly Robot and Craftly Cloud, tools that help teams coordinate work and use AI agents for tasks.
- Help with product testing, including A/B tests, bug reporting and follow-up on fixes, website updates, and background research for new features.

AI AND SOFTWARE PROJECTS

Krishoker Kotha: Voice-First Farm Support Live demo Aug 2026
Hackathon prototype, solo entry, Build with AI Hack Days @ BAU

- Farmers report a crop, fish or livestock problem by speaking Bangla or sending a photo. The AI turns it into a structured case with a code the farmer can use to check the reply.
- Built separate pages for field officers and specialists. Cases go to the right Upazila officer (DAE, DoF or DLS) by location, and serious ones to a university specialist. Three similar reports from one area within 48 hours are flagged as a possible outbreak.
- **Tools:** Next.js, Supabase, ElevenLabs speech-to-text, Gemini

Chashi Bondhu: Crop Disease Checker Live demo Oct 2025 – Sep 2026

- A farmer photographs a sick leaf with a phone and gets the disease name and treatment in Bangla or English, with an option to hear it read aloud.
- Follow-up chat uses Google Search to answer questions on dose, safety and where to buy products in Bangladesh. Photos are compressed on the phone so they upload on slow mobile data.
- **Tools:** React, TypeScript, Gemini (vision, search grounding, text-to-speech), Vercel

PlantDoc: Plant Disease Q&A with Page Citations Live demo 2026

- Answers plant-disease questions and reads leaf photos using a 948-page plant pathology textbook, citing the page each answer comes from so it can be checked.
- **Tools:** Next.js, Gemini, Pinecone (retrieval-augmented generation)

Shonar Tori: Bangla Chat Ordering Demo for a Fictional Restaurant Live demo 2026

- Users order food or book a table by chatting in Bangla on the website, Messenger or WhatsApp; staff manage orders in one dashboard. Prices come from the database, not the AI, so they cannot be made up.
- **Tools:** React, Supabase, Gemini function calling, Meta Messenger and WhatsApp APIs

Interactive Bangladesh District Data Map Live demo Oct 2025

- Upload a district-level data file (e.g. literacy rates) and see all 64 districts of Bangladesh coloured by value, so regional gaps are easy to spot.
- **Tools:** JavaScript, D3.js, Leaflet.js

TEACHING AND KNOWLEDGE SHARING

Transformers, Explained in Bangla: free online course Course 2026

- Bangla-first course (with English version) on how ChatGPT, Gemini and Claude work: 6 lessons with interactive simulators, quizzes and a 25+ term glossary. No sign-up needed.

Learn With Fahmid: YouTube and Facebook YouTube Facebook 2025 – present

- 30 short Bangla videos explaining AI for non-technical viewers, e.g. hallucination, RAG, context windows, AI agents and diffusion models.

FIELD EXPERIENCE

Agricultural Internship Programme, Faculty of Agriculture, BAU Apr – Jun 2026
Gaffargaon Upazila, Mymensingh

- Two-month placement with upazila government offices and agri-input businesses, seeing how public services and farm advice reach farmers. Took part in crop-cutting experiments for yield estimates.

Extension Field Trip, Dept. of Agricultural Extension Education, BAU Dec 2025 – Jan 2026
Atghoria Upazila, Pabna: one-week visit to local extension and government offices

VIDEO PRODUCTION

Freelance Videographer, Sajjad Hossain Snigdho (fitness content creator) Jan – May 2025

- Scripted, shot and edited short-form social media videos on running and fitness.

Personal short films Watch

- Made three live-action short films and two AI-generated short films (Google Flow), including a campus film about Bangladesh Agricultural University.

SKILLS

AI: Gemini API (vision, function calling, search grounding, text-to-speech), RAG with Pinecone, structured JSON output, prompt design, ElevenLabs speech-to-text
Web and data: Python (basics), React, Next.js, TypeScript, JavaScript, HTML/CSS, Supabase (PostgreSQL), Vercel, D3.js, Leaflet.js
Automation: n8n, Google Sheets, Gmail, Messenger and WhatsApp APIs
Video and photo: Scripting, shooting, editing, photography; Final Cut Pro, CapCut, Google Flow (AI video)
Writing: Plain-language technical writing in Bangla and English

CERTIFICATIONS

Google Certified Gemini Educator, Google for Education Verify online Aug 2026 (valid to Aug 2029)
Step into Python for Data Science, DataSkool (online course) Verify online Sep 2024

VOLUNTEERING

Voluntary blood donor, Badhan (Voluntary Blood Donors' Organization), BAU Zone 2025

LANGUAGES

Bangla: Native **English:** Fluent
